

## Fix-A-Latch

Everyone has a latch that won't catch. The usual repair requires special tools, skill, and lots of time. No more. Repairs in 4 minutes or less, and anyone can do it.

### SIMPLE SOLUTION:

Repairs problem latch that "misses the hole" when doors sag or settle.

### FOR INTERIOR AND EXTERIOR DOORS:

Includes 1 shim and strike for standard interior door (1-3/8 in.) and 1 shim and strike for standard exterior doors (1-3/4 in.) and mounting screws.

### EASY TO INSTALL:

Repairs in 4 minutes or less. No special tools required, no messy cleanup and no special skills needed.

### ULTRA THIN PROFILE:

3/32 in. profile requires only 1/8 in. clearance between door and door jamb when mounting.

When the door won't catch
